PROFILE

Monitoring and evaluation and data analysis professional with experience in quality control, data management and analysis, and in producing reports and decision-support dashboards. My work with Excel, notably Power Query, and with Power BI, complemented by hands-on data analytics training at TruBridge Healthcare, has helped me develop a methodical approach to data preparation, trend identification and the communication of results. I want to put these skills to work for data reliability, activity monitoring and the development of Business Intelligence solutions.

PROFESSIONAL EXPERIENCE

Data Analytics Intern — TruBridge Healthcare Data Analytics Externship | June — 21 September 2026

Data analytics externship · Healthcare sector

- Exploratory data analysis and trend identification: working with healthcare-sector data to examine trends, explore relationships between variables and draw out useful insights using Python and statistical analysis methods.
- Data preparation and results visualization: organizing and preparing data, then creating visualizations that highlight key findings to support interpretation and decision-making.

MEAL Consultant | May — Sept. 2025

Ministère de l'Emploi et de la Protection Sociale — Centre Social de Sassandra, Côte d'Ivoire

- M&E tool design and updating: developed 12 monitoring and evaluation tools and matrices to standardize data collection and structure the monitoring of field activities.
- Data management, quality control and analysis: supervised data collection, checked consistency and analyzed more than 150 beneficiary records; designed dashboards for leadership.
- Community accountability: deployed and strengthened 4 feedback and complaint mechanisms to better document beneficiary feedback.
- Reporting and knowledge capitalization: wrote 3 evaluation reports and best-practice briefs for the centre's leadership.
- Capacity building: trained and coached 5 team members on data analysis and evidence-based decision-making.

Independent Software Engineer (Freelance / Consultant) | 2019 — 2024

Self-employed — Remote

- Full-stack development: designed, developed and deployed cross-platform web and mobile applications for remote international clients (Python, JavaScript, SQL, Flutter), managing the entire development lifecycle.
- Marketing data analysis: analyzed digital marketing performance and campaigns for consulting clients, using custom data pipelines to evaluate acquisition channels and guide product strategy.

Assistant Project Manager — Personalized School Kits Initiative | 2015 — 2018

Jeune Équipe SARL — Abidjan, Côte d'Ivoire

- Operational logistics and supply chain: coordinated the end-to-end manufacturing, custom production and field distribution of personalized school kits to partner institutions in Abidjan, reducing unit operating costs.
- Data analysis and revenue optimization: used advanced Excel models and product-demand analyses — deepened through a data analysis course taken in parallel — to assess sales velocity and shift production toward the best-performing lines, helping triple revenue.
- Stakeholder management: worked directly with school directors and administrative stakeholders to identify operational constraints and translate field needs into tailored deliverables.

SKILLS

MEAL & field data: KoboToolbox / ODK, ActivityInfo, indicator and logframe design, beneficiary feedback mechanisms, qualitative analysis (FGDs, key informant interviews).

Data & analytics: Power BI (DAX), Advanced Excel (Power Query), SQL/SQLite, Python, statistical analysis (SPSS), data preparation and quality control.

Tools & languages: Git/GitHub, MS Office suite (Word, Excel, PowerPoint, Outlook) · French (native), English (professional, C1).
